| Office Action Summary | | 10/663,04 | 2 | PISSARNITSKI ET AL. | |
| | | Examiner | | Art Unit | |
| | | PAUL V. V | | 1623 | |
| The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply | | | | | |
| A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). | | | | | |

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. The compounds according to claim 1 of formula I, wherein R1 is an aryl group. These are classifiable in class 546, subclass 246.
- II. The compounds according to claim 1 of formula I, wherein R1 is a heteroaryl group. These are classifiable in class 546, subclass 301.
- III. The method according to claims 16-18 and 22-24, wherein R1 is an aryl group. The claims are drawn to a method that is classifiable in class 424.
- IV. The method according to claims 16-18 and 22-24, wherein R1 is a heteroaryl group. The claims are drawn to a method that is classifiable in class 424.
- V. The method according to claims 19 and 25, wherein R1 is an aryl group.
 The claims are drawn to a method of treatment that is classifiable in class
 514.
- VI. The method according to claims 19 and 25, wherein R1 is a heteroaryl group. The claims are drawn to a method of treatment that is classifiable in class 514.

Inventions of Groups I-II and Groups III-VI are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially

Application/Control Number: 10/663,042

Art Unit: 1623

different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product, such as the compounds disclosed in WO 00/50391 for treating Alzheimer's and other diseases relating to the deposition of amyloid protein.

The inventions of Groups I-VI are separate and patentably distinct because there is no patentable co-action among them and a reference anticipating one member will not render another obvious.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and different classification, a search of the six groups designated above would impose an undue burden upon the examiner, and restriction for examination purposes as indicated is proper.

A telephone call was made to Thomas A. Blinka on March 23, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is requested to elect a specifically disclosed species of the invention to be examined for search purposes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL V WARD whose telephone number is 571-272-2909. The examiner can normally be reached on M-F 8 am to 4 pm.

Application/Control Number: 10/663,042

Art Unit: 1623

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James O Wilson can be reached on 571-272-0661. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
